

# RESIDENTIAL TILE INSTALLATION

Rumford Stone is pleased to announce that we've added Residential Tile Installation services to our product offering. Since 1988, our sister company, Capital Tile & Marble, has long been a leader in the high-end residential and commercial ceramic tile business in Eastern MA and Southern NH. In fact, Rumford Stone was originally a spin-off of Capital Tile back in 1995.

Due to the high demand for reliable, high quality residential tile installation services, we've decided to combine Capital Tile's extensive experience and skilled tradesmen with Rumford Stone's offering and create a comprehensive, full-service countertop and tile solution for our customers in Northern New England.

An outline of our service offering is listed below. Please note that all work will be priced and performed on your Rumford Stone account. Please feel free to reach out to Kristen or Tanya for more information.

Tanya Clark-Smith: [tanya@rumfordstone.com](mailto:tanya@rumfordstone.com) (603) 393-6284
